SUMMARY

Informatics Engineering student specializing in front-end development and UI/UX design, with hands-on experience building responsive and interactive web applications using React.js, Next.js, TypeScript, JavaScript, Laravel, and Tailwind CSS. Experienced in integrating RESTful APIs and managing data flow between front-end and back-end systems to create dynamic and scalable digital solutions.

Committed to clean code practices, user-centered design, and eager to contribute to innovative digital projects within a collaborative team environment.

EDUCATION

UIN Sunan Gunung Djati Bandung

2023 - Present

Bachelor's degree - Informatics Engineering

- GPA : 3.91

SMA Angkasa LHS Bandung

2020 - 2023

Science

- Average Score : 90

WORK & ORGANIZATION EXPERIENCE

Internship Front End Developer - PT Len Industri Persero

Feb 2026 - Present

- Sliced responsive UI designs into reusable components using React.js and Tailwind CSS.
- Implemented Micro Frontends architecture to optimize team workflow and decouple application modules.
- Integrated RESTful APIs for OMNICODE NV System (navigation) and OMNICODE GB (TNI AD/AL tactical communication).
- Conducted User Acceptance Testing (UAT) to ensure API reliability and seamless system functionality.

Cohort DBS Coding Camp - Data Science

Feb 2026 - Present

- Learning & Progress Tracking: Completed Data Science curriculum via Dicoding and attended weekly facilitator sessions for progress updates, assignment reminders, and Q&A.
- ILT Sessions: Participated in expert-led Instructor-Led Training (ILT) covering technical Data Science, career readiness, and professional English.
- Capstone Project: Collaborated in a cross-functional team to develop a data-driven project using Machine Learning for real-world case studies.

Fullstack Developer - CV. Sona Jaya Technology (Project Based)

Jan 2026 - Present

- Developed Hablun, a financial platform, building both responsive front-end interfaces and scalable back-end systems using React, Next.js, and TypeScript.
- Engineered core financial modules including Financial Reporting, Peer-to-Peer (P2P) Lending, and Syirkah (partnership).
- Designed and integrated secure REST APIs to ensure seamless data flow and interaction between the user interface and database.

Internship Junior Staff IT - PT Akur Pratama Yogya Center

Jan - Feb 2026

- Developed a Self-Checkout web application as a Fullstack Developer, utilizing React/TypeScript for the front-end and Laravel for the back-end.
- Engineered core functionalities including product scanning, secure transaction processing, and database management for retail operations.

- Designed a highly intuitive and responsive user interface to streamline the customer checkout journey and improve operational efficiency.

Mentee Career Coaching Front End Developer - SisTech FASILKOM UI

June - Aug 2025

- Mentored by industry professionals to gain practical insights into the Front-End Developer role
- Developed an industry-ready resume and portfolio aligned with professional standards
- Trained in HR and technical interviews, communication, time management, and team collaboration
- Learned how to handle workplace challenges such as communication, time management, and team collaboration.

ACHIEVEMENT

- Awardee Scholarship - Bank Indonesia
- Awardee Scholarship DBS Coding Camp - Data Scientist

Oct 2025
Jan 2026

SKILLS

Technical skills

JavaScript, TypeScript, PHP | React.js, Next.js, Laravel, Tailwind CSS | Kotlin | Figma | Excel, Python

CERTIFICATIONS

- Database Programming with SQL - Oracle Academy
- Database Design - Oracle Academy
- Linux Essentials - Cisco
- Dicoding - Introduction for data science
- Dicoding - Belajar Machine Learning untuk Pemula
- Dicoding - Belajar Fundamental Pemrosesan Data
- Dicoding - Basic Web Programming
- Dicoding - Basic Java Script
- Luarsekolah - Web Developer Internship
- Badge & Skill Badge - Google Cloud Skills Boost
- RevoU - Mini Course Data Analytics
